

ATTENTION: VILLAS RESIDENTS, FAMILY MEMBERS AND TEAM MEMBERS

IMPORTANT – 12/2/2020 COVID-19 UPDATE – *please read this in its entirety.*

In accordance with shared recommendations for the Centers for Disease Control, Centers for Medicare and Medicaid Services, the Pennsylvania Department of Health and others, we are required to notify you each time there is a change or development in our Covid-19 status, including new cases among residents and/or team members. We are also required to notify you if we admit a resident with a Covid-19 diagnosis even if they have met the criteria for discontinuation of transmission-based precautions.

We have started to receive test results back from our lab for tests completed at the end of the last week and the beginning of this week. In an effort to help identify cases quicker, we are administering testing on all residents in 4-5-day intervals as opposed to weekly. We continue widespread testing of team members that takes place at least weekly and is administered at various times throughout the week. In addition to our ongoing testing, we continue to test residents who present symptoms consistent with Covid-19 and request staff consult with their clinician in the event they present with symptoms.

Since our last bulletin, we received notification that four new residents have tested positive and two new team members tested positive for Covid-19. The residents and their responsible parties were immediately notified verbally of these diagnoses.

Since this outbreak began on November 12, 2020 we have had a total of 36 residents and 20 team members at the Villas test positive for Covid-19. In addition, we have also admitted one resident who has met the criteria for discontinuation of transmission-based precautions.

Any residents who have tested positive and remain in our care reside in one of our designated “Red Zone” neighborhoods. “Red Zone” neighborhoods are Orchards A and one half of the Meadows, which was isolated off last week in anticipation of becoming a “Red Zone.” Here residents may receive proper care until they meet criteria for discontinuation of transmission-based precautions as defined by CMS and PA DOH.

We continue to be vigilant as a community and a team in our efforts to minimize the spread of Covid-19 and while we are experiencing positive cases in residents and team members, we are still very proud of our team and our residents for doing their best to minimize case numbers in a period of high community transmission; data estimates that more than 1-in-10 people in our region currently have Covid-19.

Over

All other resident neighborhoods continue to follow “Yellow Zone” protocols, a measure required to be taken when a potential exposure exists.

Please review our website for further information regarding procedures already in place due to positive Covid-19 cases. Please keep those impacted by Covid-19 in your thoughts and prayers.

If you have any questions regarding this communication or St Paul’s plan of action please contact Tammy Lininger, Administrator at the Villas or Leann McCurdy, Director of Nursing at the Villas.
