

ATTENTION: VILLAS RESIDENTS, FAMILY MEMBERS AND TEAM MEMBERS

IMPORTANT – 11/19/2020 COVID-19 UPDATE – *please read this in its entirety.*

In accordance with shared recommendations for the Centers for Disease Control, Centers for Medicare and Medicaid Services, the Pennsylvania Department of Health and others, we are required to notify you each time there is a change or development in our Covid-19 status, including new cases among residents and/or team members and if we admit a new resident who is currently positive for Covid-19.

We began our weekly testing again on Monday, November 16, 2020 of all residents and team members in the Villas and continue to test residents who present with symptoms consistent with Covid-19. We have been notified of three new residents and one new team member having a positive test result. Residents remaining in our care have now been moved to our designated “Red Zone” neighborhood, Orchards A, where they may receive proper care and minimize the risk of further exposure to others who are not positive. The residents and their responsible parties were immediately notified verbally of this diagnosis.

Since this outbreak began on November 12, 2020 we have had a total of ten residents and eight team members at the Villas test positive for Covid-19.

All other resident neighborhoods continue to follow “Yellow Zone” protocols, a measure required to be taken when a potential exposure exists.

Please review our November 14, 2020 update posted on our website for further information regarding procedures already in place due to positive Covid-19 cases. Please keep those impacted by Covid-19 in your thoughts and prayers.

If you have any questions regarding this communication or St Paul’s plan of action please contact Tammy Lininger, Administrator at the Villas or Leann McCurdy, Director of Nursing at the Villas.
