

Visitation Guidelines UPDATES: (updated 09/21/2021)

Visitors – we would kindly ask that you please postpone visitation if you have any cold or respiratory symptoms or if you have been around anyone with cold or respiratory symptoms in the last 14 days regardless of your vaccination status. We ask this in an abundance of caution for our residents. Thank you!

Visitors MUST adhere to the Core Principles of COVID-19 Infection Prevention as outlined by CMS, CDC and PADOH:

1. ALL visitors (including children) MUST be successfully screened first through the Accushield kiosk before proceeding to the resident room or other *designated location*. If the screening generates an alert, please see the receptionist before proceeding.
2. All visitors must wear their screening stickers.
3. **Regardless of vaccination status, visitors must wear a well-fitting cloth or surgical mask (covering mouth and nose) at all times whether inside or outside.** We ask you to encourage and assist residents with wearing a mask during your visit.
4. Use hand sanitizer before and after your visit. *Please assist your resident to do the same.*
5. Maintain physical distance. If a resident is fully vaccinated*, he/she may choose to have close contact during a visit including physical touch while wearing a well-fitted mask and using hand hygiene before and after contact. Please maintain physical distance with all other residents and team members.
6. Visitation is limited to no more than 3 visitors at one time. If more than 3, we ask that you please wait outside or in your car to minimize congestion within the building.
7. Visitation may ONLY occur in resident rooms/apartments or outdoors. ***If visiting in a shared private room, please pull the curtains to both your loved one's room and their roommate's room during your visit.*** Visitation is not permitted in common spaces such as dining rooms, great rooms or hallways. Dining times to avoid are 11:30-12:30 and 4:30-5:30. Please do not linger during entry or exit of the building. Visitors may wait in resident's room/apartment during meals.
8. Residents in 14-day quarantine or in isolation can have virtual or window visits. In-person visits are limited to end of life or compassionate care situations.
9. Please limit your touching of any surfaces. Clean/disinfect high touch surfaces.
10. **Visitors should continue to monitor for any signs or symptoms of a respiratory infection for 14-days after your visit. If symptoms occur, self-isolate at home, contact your doctor and immediately notify St. Paul's administration of the date of your visit and the names of individuals you had contact with while at St. Paul's.**

11. VISITATION HOURS: Daily: 9AM-7:30 PM

*Fully-vaccinated: (at least 2 weeks following receipt of the 2nd dose in a 2-dose series or following receipt of one dose of a single-dose vaccine)
